TECNOVE
BUSINESS GROUP

Vehicles

We design, manufacture and provide maintenance of special vehicles or adapted bodyworks by means of state-of-the-art technology, expert-level engineering and full customization.

We have an extensive network of manufacturers, distributors and partners globally to ensure a maintenance service that meets the needs of all sorts of clients.

**TECNOVE, TECAI, TECNOVE
Fiberglass and TECNOVE
Custom Trucks** are the
companies in the group that
are specialized in the design
and modification of vehicles.
They can create a world on
wheels.

Each of them designs
and develops its products
according to the needs and
specifications requested, with
maximum attention to detail
and direct communication
with the client so that the
vehicle ends up being a unique
solution for the client.

All our units can be
manufactured on any
vehicle body, from semi-
trailers, chassis cabs or vans,
always depending on the
specifications of the client and
the environmental and legal
conditions of the location, to
ensure they fulfil their purpose.

Healthcare & Emergencies

Our mission is to ease the work carried out by health and emergency personnel by designing vehicles capable of fulfilling their purpose in the conditions of the target location.

In our health and emergencies business line, we develop mobile medical units, ambulances, first-response vehicles, advanced command posts, etc. All vehicles are equipped with the necessary material and equipment so that they can carry out the client's activities wherever they are needed.

Mobile Medical Units

Response
Vehicle

Blood Donation Units

Advanced Command Post

Defence & Security

The range of defence and security products includes troop and cargo trucks, border surveillance units, air control towers, workshop vehicles, trailers, CBRN units and police vehicles.

All units can be transformed by adapting the structure, chassis or bodywork to fit the necessary equipment and any additional elements.

Military Vehicles

Military Vehicles

Police and Armored Vehicles

Refrigerated Vehicles

We design and manufacture bodies for the transport of all types of goods that require a controlled temperature during transportation. We offer both final product deliveries and kit deliveries, along with digitalized systems for monitoring and managing transportation and storage conditions.

This we assure the client that they can trust us to develop the refrigerated solution that they need.

Isothermal & refrigerated bodies up to 3500Kg

Special bodies

Semi - Trailers

Isothermal & refrigerated bodies up to 26000 Kg

Isothermizing of urban delivery vehicles

Logistics & Packaging

In the logistics business line, we can offer tipper-type bodies, bottle racks, tarpaulins, package carriers, butane platforms, container carriers, semi-trailers, etc. We can also assemble self-loading cranes and other lifting devices on industrial vehicles, trailers and semi-trailers.

All our products are adapted to the special needs of the industrial and construction sector. We design and manufacture vehicles that provide added value to our clients' projects.

Light-bodied tipper

Heavy-bodied tipper

Butane tanker

Sliding semi-trailer

Light enclosed cargo box

Heavy enclosed cargo box

Telecommunications

We design and manufacture mobile units for the telecommunications sector and we also take care of their maintenance, equipment and cleaning.

The most representative units in this area are large mobile television and radio units, and mobile telephone stations on 6x6 vehicles.

TV Mobile Units

Mobile Telecommunications Unit

TV Mobile Units

Special Vehicles

In the special vehicles business line, we include all types of projects which, due to their characteristics, specifications and demands, require a higher level of development and engineering than the rest of **TECNOVE's** products.

These include railway and airport vehicles, retail, marketing and training vehicles, as well as waste management and environmental preservation vehicles.
