Remarketing

In the remarketing and fleet maintenance area we have implemented a unique workflow which allow us to carry out the required repairs for more than 200 vehicles on a weekly basis.

In the remarketing and fleet maintenance area we recondition all sorts of vehicles by performing:

- Body and paint restoration.
- Mechanical diagnostics.
- Wind screen repair or replacement.
- Tire restoration or replacement.
- Smart Repair.
- Thorough cleaning and top-down decontamination inside and outside the vehicles.
- Transport.

TECNOVE Remarketing also takes care of collecting, inspecting and storing vehicles in our own private 36.000m2 car deposit.

All vehicles offered have to undergo a rigorous and exhaustive final control process to guarantee top quality and reliability to our clients.

1 · Body Workshop

4 · Smart Repair area

2 · Paint cabin

5 · Cleaning and polishing

3 · Mechanical repairs and tires

6 · Storage in private car deposit

# Body workshop

We provide bodywork solutions and parts replacement whenever it would be necessary. Thanks to the strict controls that we apply to our repair, preparation and sanding process, we manage to safeguard the vehicles and handle them with the utmost care before moving on to the painting phase.

We repair and repaint tires and plastic surfaces whenever it would be possible to restore them without replacing them. And by doing so, we save in reconditioning budget costs benefiting both us and our clients.

# Paint cabin

We have three state-of-the-art Paint Cabins, one of which is double-sized and can process three cars at a time.

We collaborate with top-market paint brands to ensure that the exterior appearance of the vehicle is as visually pleasing as long lasting.

# Mechanical repairs and tires

We perform maintenance processes in accordance to the clients' needs and desires. We also change tires and can offer a wide variety of tire types and brands to meet the clients' expectations.

First-class spare parts guaranteed.

## Smart Repair Area

Thanks to our efforts that we put into the reconditioning process we bring back to life the interior of cars. We do so by restoring the upholstery of the seats, painting steering wheels and door handles, seam re-sewing, surface recovery and burns repair among many other procedures.

# Cleaning and polishing

Exterior and interior top-down cleaning of the vehicles, full upholstery cleaning, polishing with top-quality tools and products.

We pay specially attention to the last steps of this phase to present the client with a car that may appear as brand new.

# Storage in private car deposit

We have a 36.000m2 private care deposit to store the vehicles before they are transported to the required locations for their purchase.

We offer a top-down reconditioning process including storage and logistics management.
