CSC

Catering · Services · Construction

We design, build and manage buildings and modular facilities to guarantee the utmost efficiency and efficacy in any location of the globe.

TECNOVE

TECNOVE can build a home wherever you need it. We offer a top-down solution which includes the building, management and catering of camps, remote sites or modular facilities.

We are specialized in providing solutions for infrastructure projects, humanitarian aid projects or peace missions in remote locations that are difficult to access or that present harsh environmental conditions.

Our main aim is to offer real life conditions to any workforce in any place of the world as remote as it may be, in order to allow them to focus on their work and ease their day-to-day activities.

We also offer catering services for collectives, businesses, public or private institutions that take into account all their nutritional or dietary needs thanks to the qualified consultants that aid us in this mission.

Catering

Our catering services are aimed at providing an adequate nutrition in any type of facility for any type of activity. We work in hospitals and military bases to guarantee the nutritional and culinary quality of the personnel's meals. We always bear in mind the geographical location, the cultural divergences, culinary tradition and any other particular dietary requirements that an individual may have. We are proud of offering top quality produce and cuisine.

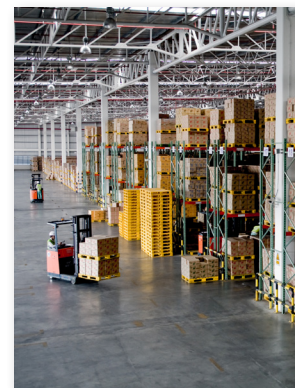

Services

TECNOVE offers management, maintenance and kickstarting services of facilities that require 24/7 functionality and have high safety and efficacy necessities.

Along with the core services that we offer, we also provide laundry, cleaning, disinfection and waste management services. We will make your workplace feel like home in any part of the world.

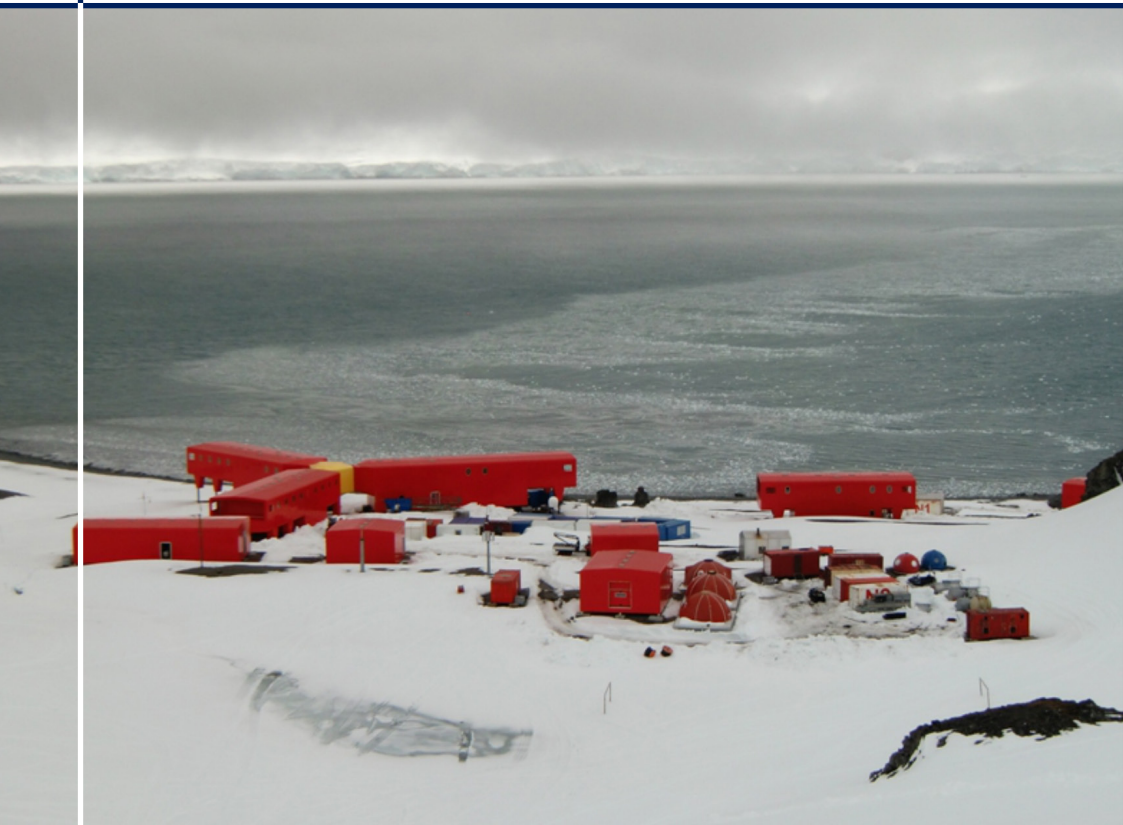

Construction

We design and build modular and non-modular facilities following these core values: power efficiency, resource optimization, space quality and durability.

Wherever you are, we will build there a place you can call home.
