TECNOVE

BUSINESS GROUP

Agribusiness

We offer consultancy and management services for agricultural planning, as well as agricultural and forestry land-use planning.

TECNOVE

TECNOVE

Agribusiness

We commercialize phytosanitary products, ecological nutrients, industrial cleaning, zero waste processes and anything else that an agricultural or food-processing business would need.

Our core values are quality, efficacy and trust-building. We work together to offer the best service possible and the greatest solutions adapted to their necessities.

As we have such a wide variety of products at our disposal, we are capable of tending to all the needs and requirements a client would have, as complex or specific as they may be, in any industrial or agricultural sector.

Our products will surely fulfil any need you may have:

- Improving harvests
- Guaranteeing the upkeep of machinery
- Cleaning or erasing oil spots
- Keeping swimming pool water as clean and hygienic as possible
- Repairs and maintenance work
- Wide range of cleaning and hygiene products

1 · Consultancy & management of agrarian activities

2 · Suppliance of fertilizers & other agricultural products

3 · Hygiene & industrial cleaning products

4 · Industrial support

5 · Forestry management

Consultancy & management of agrarian activities

Our agronomy team has capacities for surveying, evaluating and determining the state of crops or land. Thanks to their expertise they can provide you with an adequate planning for the usage of the land and the upkeep of crops to prevent plant or soil decay.

We also offer fertilization plans to allow your crops to get the nutrients they need at every growth phase in order to maximize reliability, efficacy and the health of the crops.

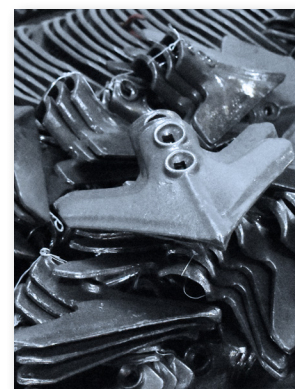

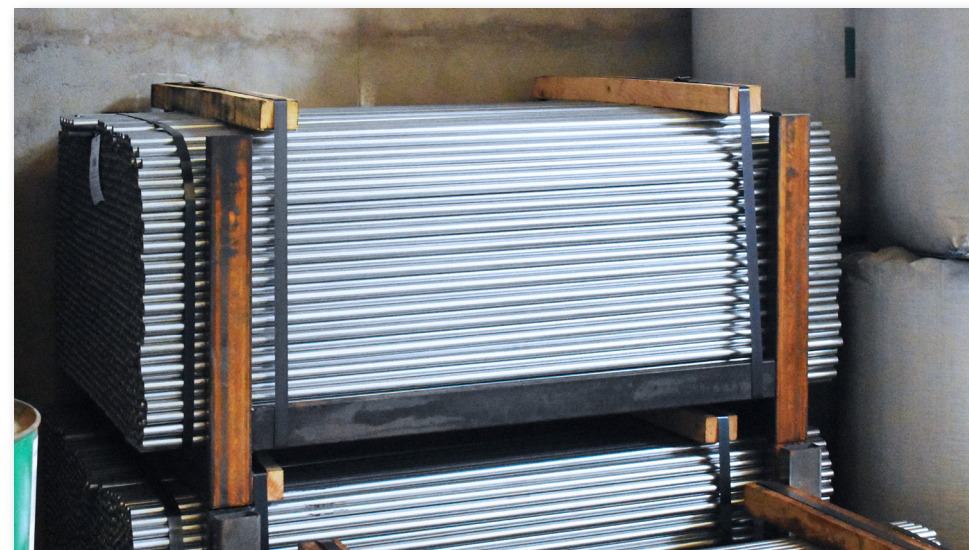

Suppliance of fertilizers & other agricultural products

We have an ample variety of products and thanks to that we are capable of fulfilling the needs of any client whether they would be related to plant and soil nutrition, organic and ecologic fertilization.

We can also provide you with whatever you need to start a new crop on any type of agrarian soil. We can supply you with plants, seeds, plant structuring material, irrigation devices, etc.

Hygiene & industrial cleaning products

We can offer all sorts of disinfection and cleaning products for any industrial, agricultural or food industry company, as well as health institutions.

Industrial support

This business line is dedicated to supplying the necessary products or spare parts to guarantee the hygiene and functionality of any type of vehicle or machinery.

Forestry management

We design and implement sustainable forestry management processes through organization and land-use planning services which survey natural areas and reduce the impact of human activities on wildlife.

We believe education and training are the core of responsible practices. As such, we provide dynamic training sessions for both public and private institutions, so they can make an efficient and conscious use of their forests and lands.
